DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pfefferle (4,819,595) in view of Beardsley et al (H1,869).

Pfefferle a portion of the surfaces which define the combustion volume are coated with metal. Pfefferle does not teach a metallic coating comprising between greater than 15% and about 80% nickel and between about 10% and about 37% chromium. Beardsley et al teach a coating comprising between greater than 15% and about 80% nickel and between about 10% and about 37% chromium. Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the composition on the surfaces which define the combustion volume of Pfefferle as taught by Beardsley et al in order to improve the catalytic combustion chamber.

Response to Arguments

3. Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection.
